(804) 497-1310 Peninsula: 826-1310

July 27, 1987

William A. Burrows
709 Division Street
Gloucester City NJ 08030

Mr. Burrows:

Thank you for the recent reception report -- it's nice to know that our signal is reaching New Jersey! Your program details are correct and I am happy to confirm your reception of WGH on 1310 kHz, April 10, 1987, at 7:27 pm.

WGH Radio operates 24 hours a day with 5 kilowatts output power. During the period from local sunset to local sunrise, WGH operates a three-tower directional antenna system. Daytime operation is non-directional with a 400' tower.

Most of the time our programming is a simulcast of our sister station WGH-FM. At the time you monitored our station we were running separate AM programming -- a baseball game.

Please continue to listen to WGH radio whenever you can. I hope you enjoy the enclosed promotional material.
